Amendments to the specification:

Please amend the paragraph on page 16, lines 9-17 as follows:

After detecting the document size (S11, FIG. 7), when entry from the number keys of the keyboard 17 is detected while the control panel 11 is ~~displays~~ displaying the screen shown in FIG. 7, the sending destination/sending mode setting section 31 obtains the key entry as a fax number for the sending destination and automatically sets the sending mode to the fax mode (NO S12, S13, S14). Note that, the number keys may be displayed in the control panel 11.

Please amend the paragraph on page 26, lines 15-17 as follows:

This makes it possible to select a suitable resolution only by matching the ~~inputted~~ inputted sending mode and the selected selection key to the table.

Please amend the paragraph on page 27, lines 13-20 as follows:

Further, as described, the image sending method according to the present invention in the foregoing method selects and sets the resolution corresponding to the selected image quality by referring to a resolution setting table which indicates correspondence between a single or plural indices of the image quality common to the plural types of sending modes and the applicable ranges of resolution of each sending mode.
